

About Us

The Specialists Guild is focused on helping people on the higher end of the Autism Spectrum (OTS), since government services are typically not available to people who are not also intellectually or physically impaired. We are a nonprofit social enterprise providing training and career opportunities for people so they are able to contribute to society in line with their intelligence and abilities.

TSG has developed a business model which can be used to establish meaningful careers for OTS people in local communities. This business model is available for social franchise to non-profits in other communities. If you are interested in learning more, please click on the link - [Social Franchise](#)
