

Work with us

We can help your company build better products - Contract your testing needs to TSG - we speak your language and work fast at reasonable rates.

User level testing of applications on mobile devices is our speciality. We have up to 3 generations of devices - IOS and Android - in our lab

Services:

- **Functional Testing** - does your product, web site or app work as intended?
- **Usability Testing** - do people visiting your web site, or using your app or device, find it intuitive and easy to use?
- **Regression Testing** - have updates or changes impacted the function of your device, app or site?
- **Compatibility Testing** - is your web site or app compatible with different web browsers, operating systems and hardware devices?
- **Test Case and Test Script Development** - our team can create the test cases and scripts for future testing
- **Data curation** and data entry
